

WORKSTRINGS, LLC

"YOUR FIRST CHOICE IN DOWNHOLE TUBULAR RENTALS"

A SUPERIOR ENERGY SERVICES COMPANY

www.workstrings.com

FASTR® System

The **FASTR®** System consists of 6-5/8" FH Slip-Proof™ Landing String design that features a 6 ft Slip-Proof™ section which prevents damage of the tubular by the **FASTR®** slip system. It is rated to a 2.0 million lb load. The special designed box taper provides increased elevator hoisting capacity for use with a 1000 Ton elevator..

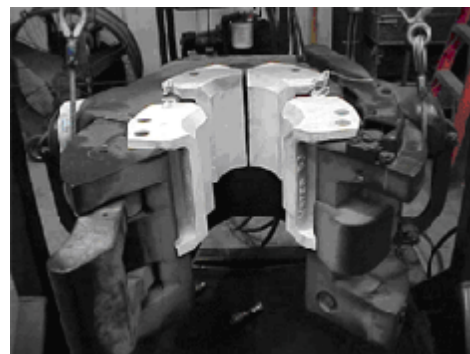

FASTR® Benefits

LANDING STRING

- Standard 6 5/8" FH connections for easy makeup and handling
- No slip crushing concerns to 2.0 Million LBS (1000 Tons)
- Tensile capacity exceeding 2.0 Million LBS (1000 Tons)
- 3 1/2" T.J. ID to accommodate pump down plug while cementing

SLIPS & ELEVATORS

- Uses conventional rig operations
- Expedites the rigging up, running, and rigging down processes
- Improves slip crushing over all other conventional slips
- Saves the operator time and money landing heavy (1.5—2.0 Million LB) casing strings

Hydraulic 1000 Ton Elevator

Split Master Bushing and Internal Bushing Assembly with Hydraulic Backsaver™ and 2 MM Lb **FASTR®** Slips

FASTR® System

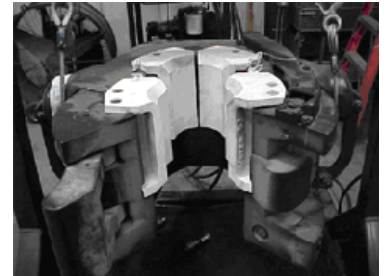

FASTR® 1000 Ton Slips

Optimum Angle and Length
For Better Load Distribution.

The **FASTR®** System is used for handling loads of up to 1000 Ton encountered when landing long strings of casing in deep water operations. The **FASTR®** system provides safe and reliable operation using standard rig equipment.

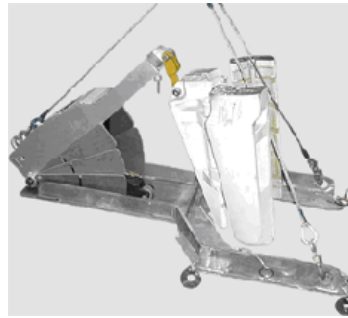

Hydraulic 1000 Ton Elevator

Dressed with special designed inserts for handling the 6-5/8" Slip-Proof™ landing string

Split/Solid Insert Bowl

Uniquely Designed to Accommodate the **FASTR®** Slips

Backsaver™

Hydraulically Operated

Split Master Bushing

Provides Easier Installation and is Designed to fit any rotary table

All **FASTR®** Handling Equipment Color Coded White For Easy Identification
